EXPERIENCE

Senior Business Analyst

10/2025 – Present

Pain Tools, AI SaaS for chronic pain management

Ann Arbor, MI

- Led cross-functional **requirement gathering** with clinicians, product and engineering teams to translate requirements into a HIPAA-aligned **relational database schema (15–20 entities)**, in **Lucid chart** and reduced backend development time by 15%.
- Identified **churn drivers** by cleaning, de-identifying, and analyzing 30,000 beta users records through cohort and qualitative analysis in **Excel**, which enabled leadership to eliminate 2 low engagement features.
- Developed Internal admin **dashboards** and defined KPI aggregation logic in the backend to monitor enrollment, retention, active users, and at-risk users, reducing reporting time by 2 hours/week.
- Authored **PRDs** containing product features, UX/UI, and technical specifications, including **LLM vendor evaluation** (GPT-oss-120b, Anthropic, Mistral) for responsible AI implementation, reducing time-to-launch by 1 month.

Business Analyst

07/2025 – 12/2025

Health Numeric, Data driven remote patient monitoring startup

Lansing, MI

- Built a neural network scoring model in **Python** using symptom data, improving decision-support performance by 18% in testing.
- Increased reimbursement accuracy by 10% by developing an **NLP-based** extraction workflow that converted 200 **unstructured** clinical notes into standardized, billing-ready Z-code datasets.
- Analyzed Ingham County Health Department's patient referral process in **R using dplyr and ggplot2**, identified inefficient provider routing, and recommended process changes that improved patient outcomes by 10%.

Clinical Data Analyst Intern

06/2024 - 08/2024

OBI Initiative, Michigan Medicine

Ann Arbor, MI

- Drove an overall 8% increase in Social Determinants of Health (SDOH) screening rates across 75 hospitals by cleaning and analyzing **12,000 claims records** using **R and SQL** for gap analysis, informing quality improvement (QI) efforts tied to VBC.
- Supported a 10% improvement in reimbursement outcomes by developing **Tableau dashboards** that compared cesarean-section rates across 70 hospitals, supporting operational performance reviews tied to P4P linked incentives.

Medical Intern

07/2022 – 05/2023

SVYASA, Bangalore, India

- Reduced reporting time by 20% by using **Excel** to calculate weekly patient volumes and test utilization across departments.
- Collaborated with clinical, administrative, and IT teams to support the transition from paper-based records to an EHR system.

EDUCATION

University of Michigan | Ann Arbor | MI

08/2023 - 05/2025

Master's in Health Informatics

Relevant coursework: Statistics, Data Visualization, Data Mining, Database Management, Predictive analytics and Machine Learning

University of S-VYASA | Bangalore | India

08/2017 - 04/2023

Bachelor's in Naturopathic Medicine

PROJECTS

KidzCare | Value-Based Care | Excel and R

- Analyzed multi-payer attribution and utilization data with 50,000 rows using **Excel and R** to assess member alignment, contract performance (MLR, HEDIS, denials), and population-level risk trends under value-based care agreements.
- Identified documentation and coding gaps through denial and adjudication analysis, highlighting drivers of revenue leakage.

Josie | Excel | Product Growth & Retention Analytics

- Conducted cohort and churn analysis on 500 user engagement records and 50 survey responses using **Excel** to identify operational and behavioral drivers of parent return-to-work challenges.
- Synthesized findings into documented retention strategies and executive-summaries to support product and investor decisions.

Medicaid Rx Trend Navigator | SQL | R | [github](#)

- Designed a SQL-based dataset of 1,000 Medicaid Drugs in Databricks to support reimbursement trend and variance analysis
- Conducted multi-state financial trend analysis using SQL and R to identify reimbursement variation and cost drivers

SKILLS

Database & Analytics: PostgreSQL, MySQL, Tableau, Power BI, Microsoft (Excel, Access, PowerPoint), Firebase (schema design)

Programming & Standard s: Python (pandas, NumPy, visualization), R, SQL, SAS, HTML, ICD-10, FHIR, GitHub (version control)
