PROFESSIONAL SUMMARY

Business Data Analyst with a **clinical background**, delivering end-to-end analytics to support **operational, financial, and product decisions in healthcare technology**. Skilled in SQL, Python, R, and BI tools, with a strong focus on **process mapping, requirement gathering, gap analysis** and **storytelling**. Currently building foundational analytics infrastructure at a healthcare startup (~\$1M ARR).

EDUCATION

University of Michigan Ann Arbor MI <i>Master's in Health Informatics</i>	08/2023 - 05/2025 GPA: 3.9
University of S-VYASA Bangalore India <i>Bachelor's in Naturopathic Medicine</i>	08/2017 - 04/2023 GPA: 3.4

EXPERIENCE

Senior Business Analyst | Process & Operations Analytics 10/2025 – Present
Pain Tools, Ann Arbor, MI

- **Accelerated backend operational efficiency by 30%** by leading structured **requirements gathering** and translating clinical, financial, care team, and product requirements into standardized, **HIPAA-compliant data structure** deployed on Google Firebase, enabling scalable patient-facing workflows across a high-traffic, AI enabled engagement healthcare platform.
- **Mapped and standardized business processes using BPMN and Miro**, translating operational workflows into decision logic that served as a logical reasoning layer for AI-assisted patient engagement, improving per-user **personalization efficiency by 30%**.
- **Bolstered cross-team execution by 25%** by configuring **ClickUp** with defined priorities and **15 Scrum-aligned workflows** enabling **6 cross-functional team** members to align execution, track progress, and deliver work against evolving business needs.
- **Enabled data-driven pricing decisions** and feature prioritization by analyzing qualitative and quantitative data from 35 beta users using **Excel** for analysis and **Power BI visualizations**, identifying key drivers of feature engagement, and willingness to pay.
- **Optimized front-end delivery efficiency by 25%** by designing **Figma-based wireframes** for the onboarding experience and conducting **user acceptance testing (UAT)** to compare design variants, validate usability, and reduce development rework.

Business Analyst | Clinical & Reimbursement Analytics 07/2025 – 12/2025
Health Numeric, Lansing, MI

- **Enhanced reimbursement accuracy by 10%** by implementing a structured approach to extract **Z-codes from 200 clinical notes**, translating unstructured documentation into standardized data to support more accurate coding and billing decisions.
- **Improved clinical decision support by 18%** by developing a **neural network-based scoring approach** to compare treatment options based on patient symptoms, supporting more **criteria-aligned decisions**.
- **Reduced manual reporting time by 20%** by developing **Tableau dashboards** to track patient indicators and cohort level trends.

Clinical Data Analyst Intern | Claims & Quality Analysis 06/2024 - 08/2024
Michigan Medicine, Ann Arbor, MI

- **Drove an overall 8% increase in Social Determinants of Health (SDOH) screening rates** across 75 hospitals by cleaning and analyzing **12,000 claims records** to identify screening gaps and variation, informing targeted quality improvement (QI) efforts.
- **Supported a 10% improvement in reimbursement outcomes** by developing **Tableau dashboards** that benchmarked cesarean-section rates across 70 hospitals, supporting clinical and operational performance reviews tied to P4P linked incentives

Medical Intern | Operations & Clinical analytics 07/2022 – 05/2023
Bangalore, India

- **Reduced reporting time by 20%** by using Excel to calculate weekly patient volumes and test utilization across departments.
- **Collaborated with clinical, administrative, and IT teams** to support the transition from paper-based records to an **EHR system**.

PROJECTS

Trinity Hospital Utilization & Cost Analysis | Tableau | [Tableau](#)

- **Analyzed 10,000 records** using **calculated fields, filters, and aggregations** to assess utilization, payer mix, cost patterns.
- Identified high-cost inpatient cost drivers across departments to support operational workflow review and capacity planning.

Medicaid Rx Trend Navigator | SQL | R | [github](#)

- **Built a database of 1,000 drug records** by cleaning, joining, and standardizing data using **SQL in Databricks**
- Used **SQL & R** to analyze factors influencing reimbursement across states, informing health department finances

Hospital Financial Modeling | Power BI Dashboard | Excel

- Transformed and processed 25,000 hospital records in Power Query & DAX to ensure accurate and complete data
- Created a Power BI dashboard identifying ED revisit drivers and bottlenecks, enabling a 15-20% improvement in staffing alignment and reducing operational waste, resulting in an estimated \$300K–\$400K in annual savings

SKILLS

Database & Analytics: PostgreSQL, MySQL, Tableau, Power BI, Microsoft (Excel, Access, PowerPoint), Firebase (schema design)

Programming & Standards: Python (pandas, NumPy, visualization), R, SQL, SAS, HTML, ICD-10, FHIR, GitHub (version control)
